

Save forest with Respect
STS3 wall panels

seven to one

SAUNA, WELLNESS, INTERIOR AND OUTDOOR MATERIALS
from aspen, alder, thermo-aspen and thermo-alder

STANDWOOD

Standwood has been operating since 2018 in Alliku village, just outside Tallinn, Estonia. We specialize in premium sauna wall panels and bench boards crafted from natural, glulam, and thermally modified wood — including aspen, thermo-aspen, alder, and thermo-alder. Our products are designed for exceptional performance in humid environments such as saunas, bathrooms, and wellness areas. Beyond saunas, they bring the same elegance and warmth to interior design projects.

Our production is rooted in **sustainability**:

- We use a vacuum-based thermal treatment to enhance durability and dimensional stability — without chemicals.
- Our energy-efficient processes help reduce deforestation and minimize CO₂ emissions.

One of our signature innovations is the **Respect Wall Panel (STS3)** — a next-generation, eco-friendly wall solution featuring:

- **Up to 7× less raw material usage**
- **Lower carbon footprint**
- **Chemical-free, odourless composition**
- **High resistance to heat and moisture**
- **Easy, fast installation**
- **Consistent year-round availability**
- **The material is tested and patented, registered European design**

Standwood is a reliable manufacturing partner for high-quality sauna wall panels and bench boards. We are open to collaboration and can provide private-label solutions tailored to your specifications—including dimensions, profiles, packaging, and branding.

Today, Standwood products enhance saunas and spas across Europe and beyond — and we continue to shape the future with innovation, craftsmanship, and unwavering dedication.

Wall panels / Respect STS3

STS3 Smart Thermo-Aspen

STS3 Smart Alder

Smart (material)	Dimensions	Quality class
Thermo-aspen	15x90	A/AB
Alder	15x90	A/AB
Aspen	15x90	A
